MUNICIPALITY OF IMPERIA · TRIAL

Self-driving bus

Passenger user guide

How to register, give your consent, obtain your boarding code and rate the service. All you need is an email address and less than a minute.

SCAN TO ACCESS

The service is accessed from this web page, with nothing to install:
app-tpl.comune.imperia.it

A project promoted by the **Municipality of Imperia** in partnership with the **University of Enna "Kore"**. Trial authorised by decree **PCM/DTD no. 94/2026**.

What it is and what you need

The **self-driving bus** is an experimental public transport service: electric shuttles run along a dedicated route with an **on-board operator** always ready to take over. Taking part is **voluntary** and **free of charge**: to board you must register once and give your informed consent, as required by the decree authorising the trial.

All you need is

- a **smartphone** with an internet connection;
- an **email address** you can open right away (or a Google account);
- **less than a minute** to complete the registration.

There is no app to install. Open your phone browser and go to **app-tpl.comune.imperia.it**: the page works on any phone, tablet or computer. You can add it to your home screen to find it with a single tap.

Please note. The application follows the language of your phone and is available in Italian, English, French, German and Spanish. You can also pick a different one from the language selector on the page. The buttons named in this guide are the ones you will see in English; the screenshots were taken in Italian, so the layout matches even where the wording does not.

The journey in six steps

1 Create your account

Email address and password, or sign in with Google.

2 Confirm your address

Open the link you receive by email: it is valid for 24 hours.

3 Sign in

Go back to the page and log in with the credentials you have just created.

4 Read the privacy notice

It states in plain words which data are collected and who sees them.

5 Enter your details and give consent

A few fields, then the box confirming you join the trial.

6 Show the code and board

Show the QR code to the operator when boarding. After the ride you may rate the service.

Registration

1 Create an account

On your first visit choose **Create an account**. Enter your email address and a password of **at least 10 characters**, then press **Create an account**.

In a hurry? On the sign-in screen you can choose **Continue with Google**: no email or password is needed and you go straight to the consent step. The service only receives your address and the name Google provides, **never your password**.

The account creation screen.

2 Confirm your email address

After submitting, a green confirmation message appears: if the address is valid you will receive an email containing the link to open.

The message comes from *Self-driving bus pilot project*; any replies go to **tplauto@comune.imperia.it**.

Nothing received? Check your junk mail folder. After **24 hours** the link expires: simply request it again from the account creation screen.

The notice confirming the message was sent.

Confirm your email address

Self-driving bus pilot project <tplauto@comune.imperia.it>

To: nome.cognome@esempio.it

Welcome to the self-driving bus pilot project in Imperia.

To complete your registration, confirm your email address by opening this link:

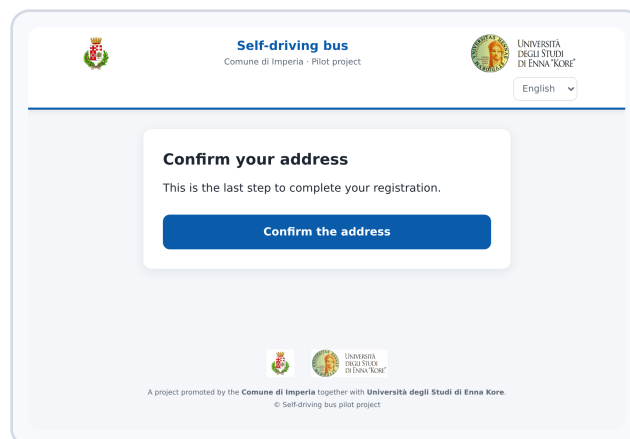

<https://app-tpl.comune.imperia.it/auth/verifica?token=0b-Cnpf5uLPrzirQ7KBkxRUfekWik6o7xdN4A8Zzj0I>

The link is valid for 24 hours. If you did not request the registration, please ignore this message.

The confirmation email: open the link within 24 hours.

3 Complete the confirmation

The link opens this screen: press **Confirm the address** to complete the check. This is the last step of the account creation.

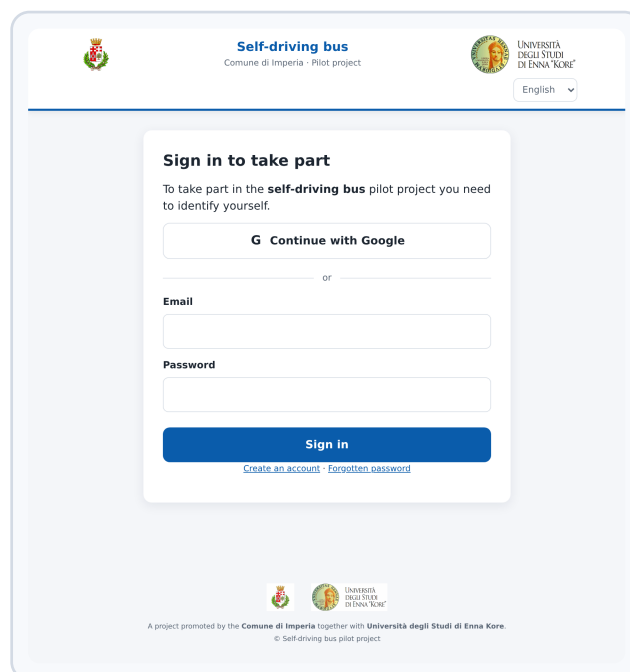

A single tap completes the check.

4 Sign in

Go back to the sign-in page: the green notice “*Address confirmed*” means everything is in order. Enter your email and password and press **Sign in**.

Forgotten your password? Use **Forgotten password** below the button: you will receive instructions by email to choose a new one.

Sign in with credentials or with Google.

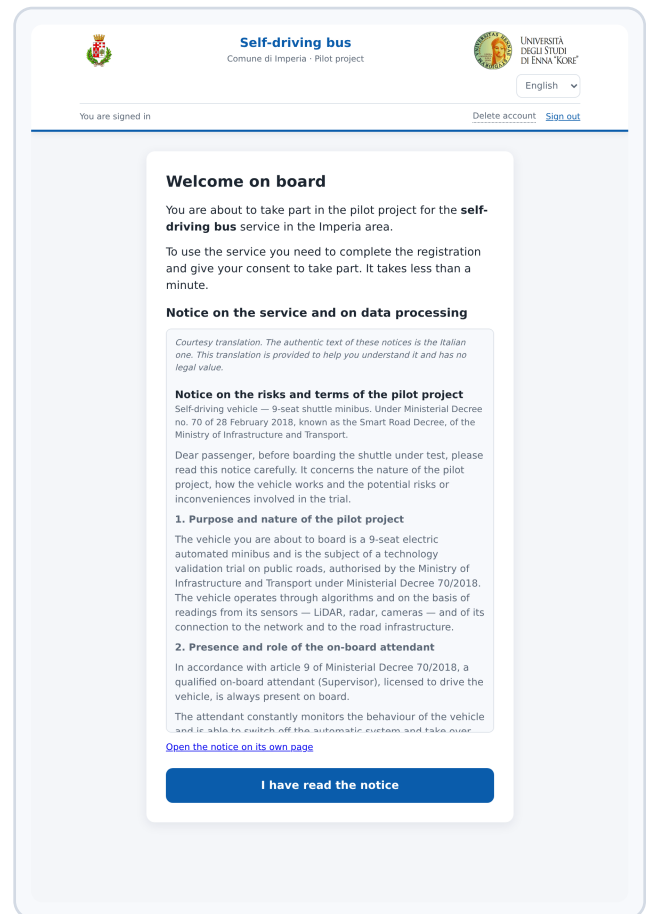

STEP BY STEP

Consent and your data

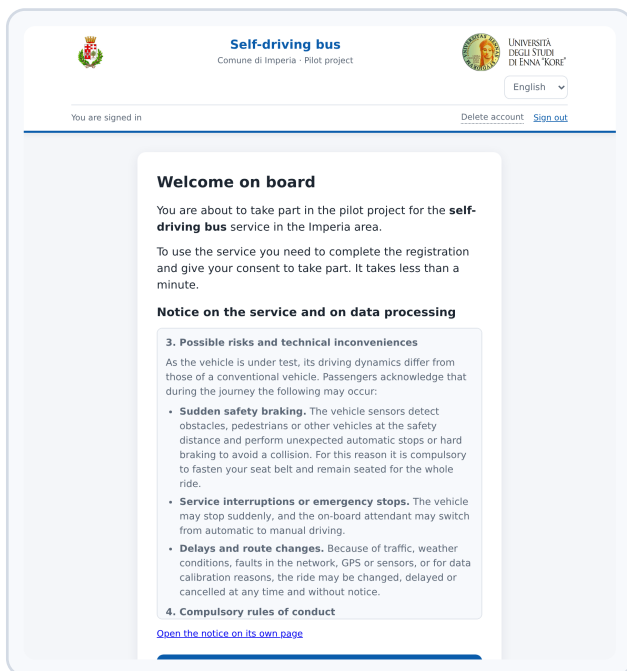

5 Read the privacy notice

The **Welcome on board** screen introduces the trial and shows the **notice** in a scrollable panel: the risks and terms of the trial, the rules of conduct on board and the processing of personal data. If you would rather read it comfortably, **Open the notice in its own page** shows it in full.

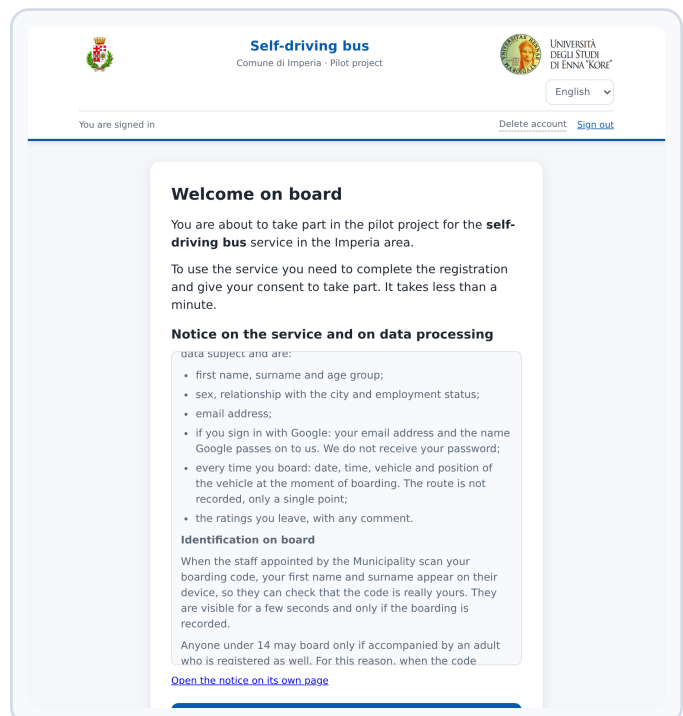

When you have finished, press **I have read the notice**. It is this step that unlocks the consent box on the next screen: until you press it, the box stays disabled.

The notice and the button that unlocks consent.

The privacy notice, first part.

Account deletion and authorisation reference.

6 Enter your details and give consent

At the top of the screen you will find the **consent box**: you tick it to declare you have read the notice and to take part in the trial. It comes before the details, not after, because consent precedes collection. If you have not yet pressed *I have read the notice* the box is disabled: the **Read the notice again** link takes you back.

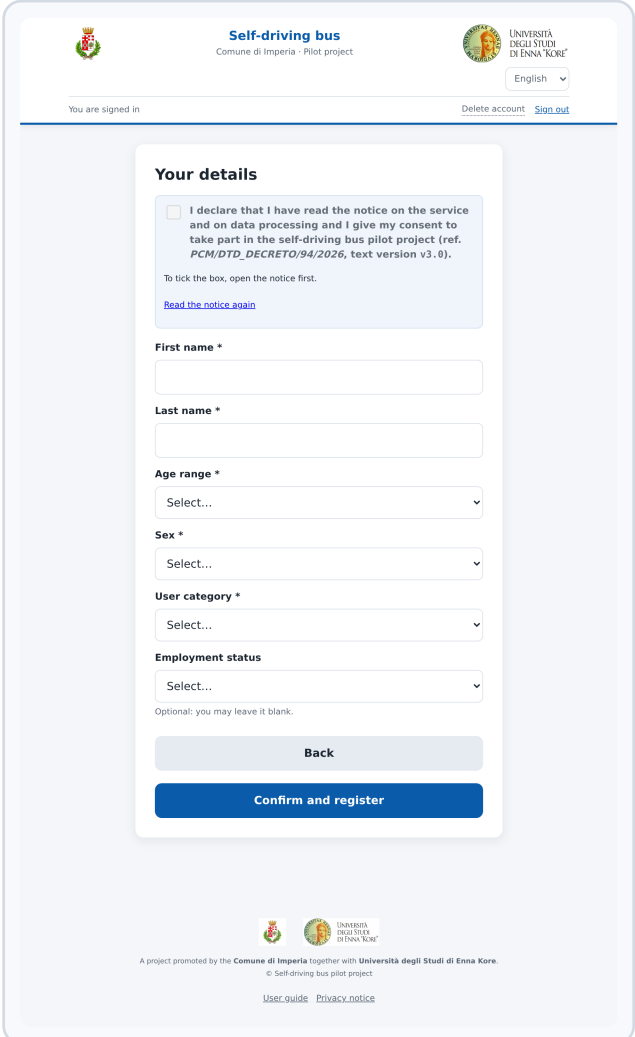

Then fill in the fields marked with an asterisk: **First name**, **Last name**, **Age group**, **Sex** and **User category**. **Employment status** is optional.

Of your age the service keeps **only the group** — 6 to 13, 14 to 30, 31 to 65, over 65 — and not your date of birth.

Finally press **Confirm and register**.

Why these details. First name and surname allow the operator to check, when you board, that the code really is yours. Age band, sex, relationship with the city and employment status serve the university research, which receives them **without your name and without your address**.

Children aged 6 to 13. They may board only if **accompanied by an adult**, and **both must be registered**: each shows the staff their own boarding code. When the code belongs to this age group, a notice appears on the operator's screen asking to check that the child is accompanied.

The consent box at the top, then the details.

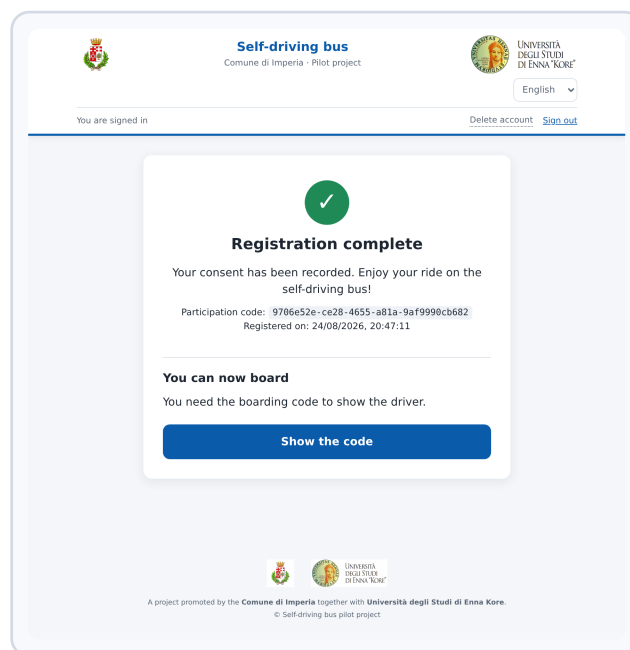

STEP BY STEP

Boarding

7 Registration completed

The green tick confirms that your consent has been recorded. From now on you are a trial participant: your **participation code** and the registration date are shown.

Continue with **Show the code** to obtain your boarding code.

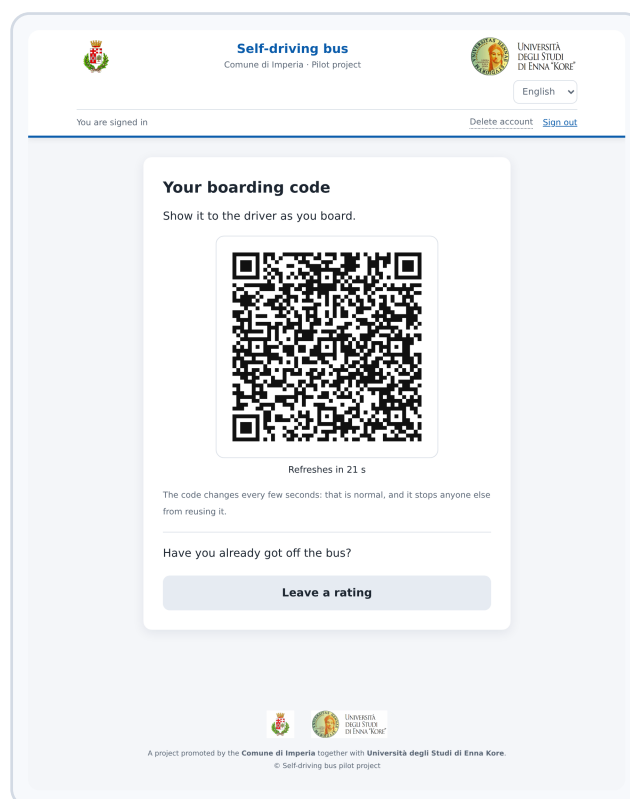

Registration complete.

8 Show your boarding code

The **QR code** is what the operator scans when you board. It is **regenerated every few seconds**: this is normal and prevents anyone else from reusing your code.

When the code is read, your first name and surname appear for a few seconds on the operator's device, solely to check that the code is yours.

At the stop. Open the code page **shortly before** boarding; turn your screen **brightness** up so it is read at once; do not take a screenshot of the code: after a few seconds it is no longer valid.

The boarding code, with its refresh countdown.

9 Rate the service

After the ride, from the same page choose **Leave a rating**: tap one to five stars and, if you wish, add a comment. Rating is optional and can be skipped.

Do not write personal data in the comment, neither yours nor other people's: the text is read by those who analyse the results of the trial.

The screenshot shows a mobile application interface for the 'Self-driving bus' pilot project. At the top, there are logos for the Comune di Imperia and the Università degli Studi di Enna Kore, along with a language selector set to 'English'. Below the header, a central modal box titled 'Rate the service' contains the following elements: a question 'How satisfied are you with the self-driving bus?', a five-star rating system with the first star selected, a 'Tap a star to vote' instruction, an optional comment section with the prompt 'What did you like, or what would you improve?' and a text input field, and two buttons at the bottom: 'Skip' and 'Send rating'. The footer of the app displays the logos of the project partners and the text: 'A project promoted by the Comune di Imperia together with Università degli Studi di Enna Kore. © Self-driving bus pilot project'.

A rating and, optionally, a free-text comment.

Your data, in brief

What follows is a summary of the notice you read in the application. In case of any discrepancy, the full text published on the page prevails.

Topic	How it works
Data controller	The Municipality of Imperia , pursuant to Regulation (EU) 2016/679 (GDPR).
Registration data	First name, surname and age group; sex, relationship with the city and employment status; email address. The date of birth is not kept.
Signing in with Google	Only the email address and name provided by Google are received. Your password is never passed to the service.
Data for each boarding	Date, time, vehicle and vehicle position at the moment of boarding : a single point, not the route you travel.
Identification on board	Your first name and surname appear to the operator for a few seconds, and only if the boarding is recorded.
What the University receives	For research purposes: age band, sex, relationship with the city, employment status, ride data and ratings, without name, surname or email and without any identifier allowing the person to be traced.
Retention	Registration data are kept for 24 months from the last sign-in, then deleted; ratings become anonymous after 12 months , remaining as statistical data only.
Deletion	With Delete your account your identifying data, credentials, consent and comment texts are removed. Ratings and rides remain, no longer traceable to you, with statistical data only.
Your rights	You may exercise the rights under Articles 15-22 GDPR by contacting the Municipality of Imperia as data controller.
Authorisation reference	Decree PCM/DTD no. 94/2026 · notice text version v2.0 .

The software behind this service is public and open to scrutiny. As an application commissioned by a public authority, its source code is released under the open **EUPL-1.2** licence (European Union Public Licence) and published in the Municipality of Imperia organisation: <https://github.com/comune-di-imperia>. Anyone can therefore read the code and check for themselves how the data described on this page are collected, stored and protected, as required by Article 69 of the Italian Digital Administration Code.

How the trial service works

The trial is organised in progressive phases. The electric shuttles run on a dedicated route at a maximum speed of **15 km/h**, with an **attendant** on board always able to take manual control. In the phase with passengers, up to **eight seated people** travel besides the attendant; the service runs on demand and rides are **free of charge**.

If something does not add up

The QR code keeps changing: is that a problem?

No, that is how it is meant to work. The code is regenerated every few seconds precisely so that it cannot be copied and reused by others. Show it directly from the page, without photographing it.

I have not received the confirmation email.

Wait a few minutes and check your junk mail. Make sure you typed the address correctly. The link is valid for **24 hours**: after that, simply register again.

Can I board without registering?

No. As this is a trial, taking part requires informed and voluntary consent: registration is how that consent is collected.

Do I have to pay anything?

No. Rides during the trial are free and registration is free of charge.

Do I need to download an app from the store?

No. The service is a web page: open it in your phone browser at **app-tpl.comune.imperia.it**.

I have changed my mind: can I withdraw my consent?

Yes, at any time, using **Delete your account** in the top bar. From then on you can no longer board, unless you register again.

Is my movement tracked?

No. Only the vehicle position **at the moment of boarding** is stored. The route you travel is not tracked.

Must I show an identity document to the operator?

When boarding, the QR code is enough: your details appear on the operator's device and are used only to check that the code is yours.

Everything on one page

This page sums up all you need in order to board. You can print it and keep it to hand, or save it on your phone.

Step	What to do
1. Account	Open app-tpl.comune.imperia.it and choose <i>Create an account</i> : email and password of at least 10 characters. Alternatively, <i>Continue with Google</i> .
2. Confirmation	Open the link received by email within 24 hours and press <i>Confirm the address</i> .
3. Sign in	Return to the page with the credentials you have just created.
4. Privacy notice	Open and read the data protection notice, then press <i>Continue</i> .
5. Details and consent	First name, surname, age group, sex and user category; consent tick; <i>Confirm and register</i> .
6. Boarding	Open <i>Show the code</i> shortly before boarding and show the QR code to the operator: it refreshes every few seconds.
After the ride	Optional: leave a rating from one to five stars, with a comment containing no personal data.

Remember. You register **only once**: for later rides you simply sign in and open your boarding code. Rides are **free** and taking part is always **voluntary**: you may withdraw at any time using *Delete your account*.

Need help?

For assistance with registration, consent or access to the service, write to **tplauto@comune.imperia.it**.

The service is available at **app-tpl.comune.imperia.it**.

Trial of the self-driving local public transport service of the Municipality of Imperia, carried out under the Italian NRRP – Mission 5, Component 2, Investment 2.1 “Urban regeneration”, in partnership with the University of Enna “Kore” and the University of Genoa. Authorisation: decree PCM/DTD no. 94/2026.

Passenger user guide · August 2026 edition · prepared by the Works Management, Eng. Carlo Capacci. The images reproduce the application screens as at the date of drafting.
